

## INSTRUCTIONS FOR CONVERTING .M FILES (SCRIPTS, FUNCTIONS) INTO PDF'S

- (1) With your m. file open, select the "Publish" tab
- (2) Click on the small black arrow under "Publish" to the right, and select "Edit Publishing Options"
- (3) In the window that pops up, under "Output file format" select "pdf" (or other, if you wish)
- (4) Under "output folder," change the output destination folder, if desired
- (5) **IMPORTANT:** Further down, under "Evaluate code", select "false" (else you script will actually run, which may take time...)
- (6) Click "publish" - a pdf file should open in Acrobat or your designated pdf program within a few seconds
